Sir:

1. Pursuant to 37 C.F.R. 1.97 and 1.98, and in compliance with 37 C.F.R. 1.56, the Office's attention is directed to the patents, pending applications, publications and other information listed on the attached PTO-1449. A copy of each listed document is enclosed except for those previously cited or submitted to the Office in the following application(s) upon which this application relies for an earlier filing date under 35 U.S.C. 120:

Serial No.: _____
Filing Date: _____

Regarding any document, publication or other information for which a date is not given on the attached PTO-1449, Applicant(s) believe(s) the same may qualify as "prior" art to this application and should be treated accordingly, although Applicant(s) reserve(s) the right to contest the prior art status of any document, publication or information, should issue arise.

2. Regarding each listed document that is not in the English language, an English-language translation accompanies this Statement as indicated on the attached PTO-1449 or a concise explanation of the relevance of the document is set forth in the following document(s):

- (a) ___ Copy of each English language version of a search report (or EPO Search Report) indicating the degree of relevance found by the foreign office of each document being submitted from the search report.
- (b) X Attachment entitled "Concise Explanation of Relevance of Non-English Language Documents".

3. Pursuant to 37 C.F.R. 1.97(b) this Statement is being filed (one must be checked):

- (a) ___ Within 3 months of the filing date, date of entry into the National Stage, or filing date of CPA.
- (b) X Before the mailing date of a first Office Action on the merits. If this Statement is not filed before the mailing date of a first Office Action on the merits, the required certification is given below or, in the absence thereof, the Office is authorized to charge the required fee set forth in 37 C.F.R. 1.17(p) to Deposit Account No. 18-0988 for consideration of this Statement.
- (c) ___ Before the mailing date of a first Office Action on the merits after a first or second submission after final rejection under 37 C.F.R. 1.129(a).

(d) ___ After the period set forth in 37 C.F.R. 1.97(b) but before the mailing date of either a final action or a notice of allowance.

(1) ___ The required certification is given below, or

(2) ___ Enclosed is a check covering the fee set forth in 37 C.F.R. 1.17(p) for consideration of this Statement, or

(3) ___ Charge the fee set forth in 37 C.F.R. 1.17(p) to Deposit Account No. 18-0988

(e) ___ After the mailing date of either a final action or a notice of allowance, but before payment of the issue fee. Petition hereby is made for consideration of this Statement and the required certification is indicated below.

(1) ___ Enclosed is a check covering the fee set forth in 37 C.F.R. 1.17(p), or

(2) ___ Charge the fee set forth in 37 C.F.R. 1.17(p) to Deposit Account No. 18-0988.

4. Certification (if applicable)

(a) ___ The undersigned hereby certifies that each item of information contained in this Statement was first cited in any communication from a foreign patent office in a counterpart foreign application not more than 3 months prior to the filing of this Statement.

(b) ___ The undersigned hereby certifies that no item of information contained in this Statement was cited in a communication from a foreign patent office in a counterpart foreign application or, to the undersigned's knowledge after making reasonable inquiry, was known to any individual designated in 37 C.F.R. 1.56(c) more than 3 months prior to the filing of this Statement.

5. The Commissioner is hereby authorized to charge any additional fees or credit any overpayment to Deposit Account No. 18-0988.

Respectfully Submitted,

RENNER, OTTO, BOISSELLE & SKLAR, LLP

The object of this specification relates to a mounting rail for panels that are not connected directly to each other but with the help of bridges 9.

According to Fig. 3 a mounting rail 1 is planned, on which holding claws 6 are arranged in appropriate distances. Additionally further holding claws 4 punched out of the mounting rail 1 as well and connected via an elastic, compressable tongue 14 with the mounting rail 1 are planned in corresponding distances.

The panels only have grooves 7 which legs interact with the holding claws 4 or 6. As shown in Fig. 4 a panel 2 is connected with one bridge of the groove 7 firstly to holding claw 4, which is elastically mounted on the mounting rail 1, and secondly the leg of the groove 7 formed on the opposite periphery is introduced into holding claw 6. Subsequently a batten shaped part 9 is introduced into the groove 7, which covers the holding claws 5 and 6 and which causes the holding spring 4 not to push away the panel 2 from the mounting rail 1. The batten 9 is taken in from the groove 7 of the panel 2 to be adjoined, which panel 2 is fixed by a holding claw 6 as well.

The mounting rails described in this specification are not comparable to the claws of the invention, having entirely different characteristics and a different mode of action.

GROUP 3600

The object of this Specification relates to a holding device for panels with grooves.

For this a holding claw 2 is connected to a wooden surface or a batten 1 respectively with bends 11 formed in the basic element 6 interacting with corresponding supporting surfaces and recesses respectively. Furthermore the claw 2 attached to the surface 1 has holding elements 9 and 161 for panels designated to form a cladding.

The claw 2 attached to the basis surface 1 has no elastically adjustable clawpart that presses a panel in the direction of another panel designated to be adjoined at all. Especially Fig. 4 and 5 are referred to, clearly showing that the claws 2 used here serve the purpose to keep panels 12a, 12b arranged on the surface 1 in position with a protruding part of the claw 2 encompassing one leg 13 of a groove 15 formed on one of the peripheral sides of the panels 12a.

CHPS 595526:

The object of this specification relates to a wall cladding.

In this specification a cladding element 6 is attached to a basis or rail 14 respectively installable on a wall. Therefore on the basis 14 holding arms 16 and 17 positionable next to the faces 9 and 12 of the flat cladding element 6 are punched out. The holding arm 16 is set at an angle and adapted to the sloping face; after laying of the cladding element 6 the second holding arm 17 is bent and therefore positioned next to the sloping face 12.

There are no relations to the present application whatsoever; a claw with an elastic holding device with which a part can be pressed onto another part does not exist.
